Equipment Booking Guide

Reservation process and session duration limits for shared workshop equipment.

LASER CUTTER SESSION	**90 minutes maximum**
3D PRINTER SESSION	**180 minutes maximum**

Reserve equipment

- Active members sign in to the **Harborlight Member Hub** and navigate to **Equipment > Book a Station**.
- Choose a trained-for machine, select an available date and start time, review the machine-specific checklist, and confirm the reservation.
- A confirmation email contains the station name, start time, and booking reference. Arrive **10 minutes early** to complete setup and material inspection.

Maximum booking durations

- **Laser cutter:** maximum **90 minutes** per reservation, including setup and cleanup. Members may hold only one upcoming laser cutter slot at a time.
- **3D printer:** maximum **180 minutes** per standard reservation, including setup and cleanup. Jobs exceeding 180 minutes require advance written staff approval and a separate supervised schedule.
- Back-to-back bookings to bypass either time limit are not permitted. Staff may end an overlong booking to restore fair access.

Changes and no-shows

- Cancel or reschedule in the Member Hub at least **2 hours before** the start. A booking is marked no-show after **15 minutes**, and the station may be reassigned.
- Machine-specific safety clearance is required before booking. See **Workshop Safety Rules**; a reservation does not substitute for orientation or staff authorization.
